

From fraud scores to validated alert decisions

1 Inspect saved fraud scores

FT-Transformer, None baseline
Share of fraud cases in each score bin

2 Select within DEV only

80% DEV / 20% TEST

ULB: deduplicate before split
Stratified holdout, seed 42

Model-specific validation

Classical / OCSVM: five folds
FT-Transformer: internal holdout

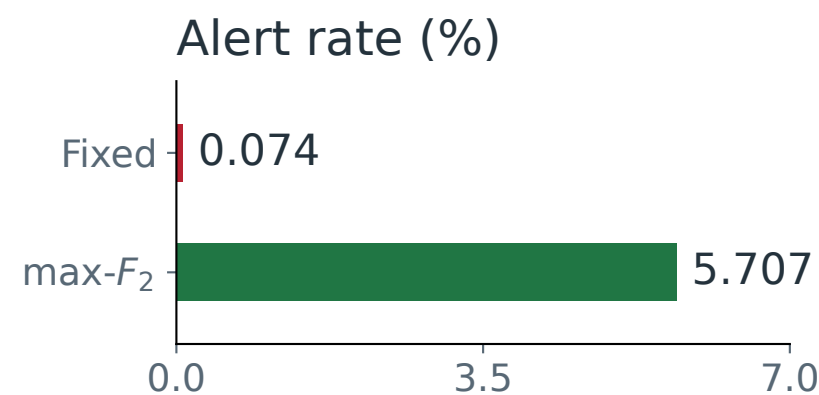

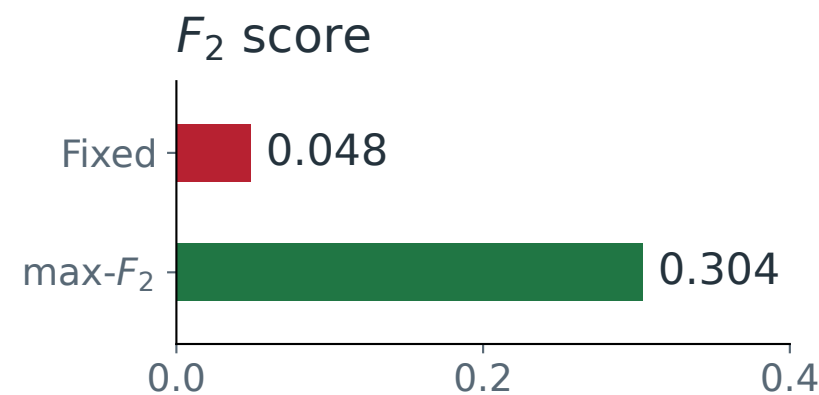

Freeze the operating rules

Reuse saved validation scores
Four rules, unchanged TEST ranking

TEST excluded from selection

3 Quantify the trade-off

BAF Base / FT-Transformer

Recall: 3.9% to 55.8%

Validate the operating point and its workload; do not infer decisions from ranking alone.
